

Visting Ho Koon Nature Education cum Astronomical Centre @Sik Sik Yuen

Date : 6-6-2024

Class : K3

Place : 101 Route Twisk, Tsuen Wan, N.T. (Ho Koon Nature Education cum Astronomical Centre)

Content :

K3 class children became very interested in astronomy and space after the previous topic "The Secrets of Space Travel". Coinciding with the theme "Sunny, Cloudy, Typhoon Weather", we visited the Ho Koon Nature Education cum Astronomical Centre, which is sponsored by Sik Sik Yuen. Through the teacher's guidance, we learned about the secrets of the sun, such as its characteristics, weight, temperature and age. We then went to the observation deck and tried operating the remote control to control the astronomical telescope. Lastly, we went to the planetarium and simulated a space travel, looking at the constellations and exploring the moon. It was an extremely exciting and awe-inspiring experience!
