

# Wetland Tour ~ Visit Hong Kong Wetland Park

Date : 12-6-2024

Class : K1

Place : Hong Kong Wetland Park

Content :

Our K1 class got to know some common animals in "The Secret of Small Animals". The sun was shining brightly today, so we went to the Hong Kong Wetland Park to see and get to know the animals in the wetland. Let's all look left and right together. We saw crocodile resting, big and small fish swimming in the pond and different birds walking and flying in the pond. Wow! We saw many fiddler crabs crawling on the muddy ground, as well as mudskippers, and recorded them one by one on the record sheet. So happy! It turns out that there are different animals in the wetland park. Parents, you can come and visit with your children to see the animals in the park!
