K2 Class Visit to " Brighter Smiles Playland " Activity

Students from K2 class began exploring the theme "Food Kaleidoscope." In daily life, we use our teeth to bite and chew food. Therefore, it's important to take good care of our teeth, as their health contributes not only to oral health but also to overall body health. Let's become "Little Seeds of Health" together.

Today, teachers led the students to visit the " Brighter Smiles Playland," where they learned how to maintain dental hygiene. They practiced proper brushing techniques and using the right amount of toothpaste. Students also had the opportunity to simulate being a dentist, checking teeth and learning about healthy eating habits. Throughout the activity, students were actively engaged and showed great enthusiasm.

In conclusion, let's all remember to brush our teeth every morning and night, keeping them thoroughly clean to maintain oral and overall health! Keep it up!

Children's Quotes:

- "I'll play the dentist and check your teeth."
- "We only need a pea-sized amount of toothpaste."
- "I brush, brush, brush, and you brush, brush, brush. Take care of your teeth, brush morning and night..."

Learning Tips:

Through visits and simulation activities, children can specifically understand the correct ways to protect their teeth. Parents are encouraged to also pay attention and remind their children of the proper brushing steps at home, cultivating a good habit of brushing teeth morning and night.
